

Hi everyone

Please find below the latest ASAP news.

NEW Trace Mineral Profiles

We are excited to announce the following additional profiles are now available for large animal clients. They are designed specifically for a single animal (or single pooled sample), rather than the two existing groups profiles.

643 Blood Trace Mineral single sample for Copper, Glutathione peroxidase and Vit B12. \$155 (ex GST)

Samples required: Single animal : 1 x LiHep Multiple animals: Submit multiple LiHep samples for pooling at laboratory

644 Blood Trace Mineral single sample for Copper, Glutathione peroxidase, Vit B12 and Zinc \$175 (ex GST)

Samples required: Single animal : 1 x LithHep Multiple animals: Submit multiple LiHep samples for pooling at laboratory

Webinar - A Refresher on Blood Film Examination

Tuesday 10th of March 2015 8PM

To start the 2015 webinar program Dr. Carl Muhlnickel, our Senior Clinical Pathologist, will discuss blood film evaluation as an integral part of any complete blood count and examination, whether in-house or at the reference laboratory.

We will announce the full webinar program soon, once again bringing you a great range of topics and speakers. Both nurses and veterinarians are welcome to join at no cost.

REGISTER NOW

Carl began his working life in small animal practice in the south eastern suburbs of Melbourne. He was accepted as an Intern in Small Animal Medicine at the University of Melbourne, where he was exposed to the breadth of veterinary practice, which encouraged him to pursue a career in Veterinary Pathology. Carl was then lucky enough to secure a residency position in IDEXX CVDL in 1998, with subsequent successful completion of Membership of the Australian College of Veterinary

Science in Veterinary Pathology. Carl is currently undertaking a recognised specialist training programme under the direct supervision of Drs Judith Nimmo and Peter Lording for the purpose of obtaining specialist registration.

To this day, Carl has remained in practice serving the veterinary community, predominantly in Melbourne, as a dedicated and conscientious Veterinary Clinical Pathologist. He values the development of a personal relationship with clients and working colleagues. Away from work he endeavours to juggle the many aspects of life, including family, golf, computer gaming and art, which he has yet to master.
