

Hi everyone

Please find below the latest ASAP news.

Progesterone Testing is NOW AVAILABLE in Bairnsdale

We are excited to provide **same-day fast turnaround of progesterone results** for East Gippsland veterinarians. We understand that Progesterone testing can often be urgent and rapid results are required. Our friendly staff at the Bairnsdale lab are ready to help. Please call our lab on 1300 VETLAB (838522) or the Bairnsdale lab directly on 5150 3475 to

request a pick up.

This test complements our existing range of routine blood testing offered out of the Bairnsdale laboratory, delivering same-day results.

Please feel free to [contact us](#) to schedule a meeting with our representative to see how we can help improve your pathology service.

Webinar: Mastering the Orthopaedic Exam – Tips and Tricks

Tuesday 14th April 8PM

Dr. Chris Preston, Registered Specialist Small Animal Surgery

Pet Emergency and Specialist Centre

Join us for this exciting webinar. Chris is a fantastic speaker with a great deal of experience to share about this important tool in your arsenal.

Last Chance To Take Advantage of the Massive Idexx® Trade-In Deal - Don't miss out. Replace your analysers for only a few dollars a day

This very popular trade-in deal is about to expire and we only have a few more systems available. If you currently have an Idexx instrument (working or not), we are offering a very attractive trade-in. Please see below and note this deal applies only until the end of March 2015:

IDEXX INSTRUMENT TRADE-IN (VALID TO 30 MARCH 2015)

VET TEST BIOCHEMISTRY ANALYSER - \$7499.00
CATALYST BIOCHEMISTRY ANALYSER - \$8490.00
LASERCYTE HAEMATOLOGY ANALYSER - \$7490.00
PROCYTE HAEMATOLOGY ANALYSER - \$7490.00
QBC HAEMATOLOGY - \$1000.00

This is a fantastic opportunity to upgrade your system and save significant dollars on reagent costs. The running costs of these new analysers are one of the main benefits of the Abaxis Systems. See examples below of a typical cost savings.

Comprehensive Screen (Including Na+ and K+) \$32.65 Vs other suppliers selling at \$59.70 (and excluding electrolytes)

Pre -GA profile cost \$20.43 Vs other suppliers selling at \$32.65

Other benefits include electrolytes, TT4 and build in Canine HWT. The Abaxis instruments are very simple to operate, can use whole blood and do not require centrifugation or special handling of the samples.

Please [contact us](#) to arrange an in-clinic meeting to discuss your needs OR [Book a free, no-obligation, 2-week trial of the instruments in your practice.](#)

*Our in-house pathology instrument range includes the state-of-the-art Vetscan VS2 biochemistry and electrolyte analyser, the HM-5 haematology analyser, the Vetscan i-Stat hand held analyser and the new VSPro coagulation / specialty analyser. The Vetscan range offers several distinct advantages, including minimal hands-on time, minimal maintenance and compact design. **Comprehensive support is also available from specialist Dr Bruce Mackay BVSc, FANZCVS (Specialist Canine Internal Medicine) at Veterinary Specialist Services who have been using the Abaxis analyzers for their in house pathology for the last 15 years.***

ADRENALS: What you wont find in a Textbook

Dr. Sue Foster, our medicine specialist consultant, is sharing her knowledge and experience in an 8-part series on Adrenal Disease. Here is number 2. Please [let us know what you think.](#)

PART 2: is coming to you in a separate email shortly

A FINAL REMINDER

As mentioned in our last newsletter, we will no longer accept lithium heparin tubes for endocrinology testing. Plain / ST tubes are the tubes of choice for the majority of biochemistry and endocrinology testing. Please contact us if you have any queries.

Thank you for reading
